

## Company Overview

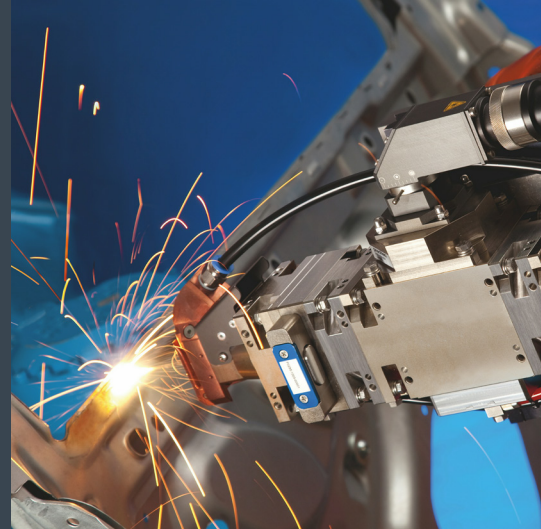

**ADVANCED MANUFACTURING SOLUTIONS**

# Introduction

Cyan Tec provides complex, precision automation to a wide range of advanced manufacturing industries including automotive, aerospace, electronics, plastics and pharmaceutical. In addition to advanced automation, Cyan Tec specialises in high-end, precision technologies including industrial laser and inkjet integration.

Cyan Tec are leaders in advanced laser and industrial inkjet integration, with a proven track record in providing high-tech solutions for a variety of applications.

Cyan Tec's strength is based on the dedication and professionalism of its highly skilled, multi-disciplinary engineers, who are focused on providing quality solutions to meet customer expectations.

## Automation

Providing customers with custom automated solutions is at the heart of Cyan Tec, uniquely offering a totally integrated engineering service providing in-house expertise from design through to installation.

Cyan Tec has a wealth of experience in conceiving and delivery solutions for complex, high-end automation projects. Customers benefit from Cyan Tec's team of specialist engineers across a wide range of disciplines.

- Advanced 3D design capabilities
- Innovative design engineering
- Highly skilled engineers
- Rigorous testing prior to delivery
- Dedicated multi-discipline installation engineers
- Onsite support and training after installation

# ADVANCED **MANUFACTURING** SOLUTIONS

# Lasers

The design and manufacture of both standard and custom laser systems plays a fundamental role in the Cyan Tec product portfolio.

Cyan Tec deliver complex laser cutting, welding and ablation machines integrating robotics, rotary tables and other methods of transfer systems.

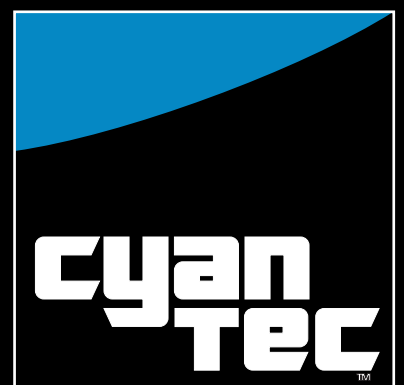

Often tailored to customer requirements, Cyan Tec also offers a range of modular laser cells, branded as 'Hyperion', to achieve cost effective advanced laser solutions.

# Industrial Inkjet

Cyan Tec are leaders in the manufacture and integration of advanced digital inkjet systems for industrial applications including packaging, pharmaceutical, medical devices, promo, decor and consumer products.

Cyan Tec provides a range of automated print systems for full colour direct to shape product decoration for mass customisation and late point differentiation, as well as precision materials deposition.
